

Front Office Full Stack Web Developer (REF:HKAD882)

Overview

Ronin Hong Kong is looking for an application developer with a strong record in commercial-quality software development. This role will work closely with our traders in the front office, on our international team with diverse backgrounds.

Who we are

Ronin Capital is a global, multi-strategy proprietary trading firm founded in Chicago in 2001. We focus on providing our traders a level of independence they desire, while inviting them to play a collaborative role in the creation and growth of profitable trading strategies. Ronin is headquartered in Chicago and has offices in New York, London, and Hong Kong.

Ronin was established around a commitment to create a highly reputable, diversified, and competitive proprietary trading firm. Ronin trades on listed exchanges in over 20 countries, in nearly every product class: equities, fixed income, commodities, currencies, options, forwards, and futures. Much of Ronin's success derives from our superior risk management experience. Our unique approach combines sophisticated quantitative market analysis with years of proven trading expertise, across multiple products.

What we offer

- Work closely with an international team of talented traders.
- Create a real and substantial impact on the business. Direct responsibilities start on day 1.
- Unlimited career possibilities. Broad exposure to the industry.
- Industry-competitive compensation commensurate with experience.
- Regular working hours. Comprehensive insurance package, paid vacation, and fitness subsidy.

Your task

- Design, implement, maintain, and support in-house web-based applications for trade monitoring and reconciliation, risk management, analytics, exchange connectivity etc.
- Work with third-party trading platforms to streamline the business' trading operations.
- Deliver stable, robust, and scalable web-based solutions to the evolving needs of the business.
- Monitor the functionality and connectivity of existing trading platforms. Provide timely and effective support to traders.

What we look for

- Bachelor degree in Computer Science, Computer Engineering, Electrical Engineering, Information Systems, or related disciplines is preferred but NOT required.
- Strong experience in FULL STACK web development with HTML, JavaScript, JS frameworks (Angular, React or similar) etc.
- Experience in full SDLC and Agile framework. Strong project management skills.
- Experience with relational databases (SQL or similar) and / or NoSQL databases (MongoDB or similar).
- Experience network programming, servers connectivity. Knowledge of network security is a plus.
- Knowledge of web-based APIs (RESTful etc.) is a plus.
- Strong English communication skills. Mandarin or Cantonese is NOT required.
- Knowledge in trading is a plus but NOT required.
